**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 10-12, drawn to an access port having a self-sealing membrane between upper and lower bodies of the device and guidewire entry site, classified in class 604, subclass 164.01.
  - II. Claims 23-27, 35-42 drawn to an access port having a rigid insert in the bottom portion of the reservoir, classified in class 604,,subclass 93.01.
  - III. Claim 44, drawn to an access port having a closeable port in the body closed by a threaded bolt or screw, classified in class 604, subclass 167.02.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II, I and III, and II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I, II, or III has separate utility such as an access port having features not found in the other inventions as described above. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species 1 drawn to Figs. 2-6

Species 2 drawn to Figs. 7-9

Species 3 drawn to Figs. 10, 11

Species 4 drawn to Figs. 12-14

Species 5 drawn to Figs. 15 and 16

Species 6 drawn to Figs. 17-19

Species 7 drawn to Figs. 20-22

Species 8 drawn to Figs. 23 and 24

Species 9 drawn to Figs. 25-27

Species 10 drawn to Figs. 28 and 29

Species 11 drawn to Figs. 30 and 31.

5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

6. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

7. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

8. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

9. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Hayes at (703) 305-5873. The examiner can usually be reached Monday -Thursday, 7:00-4:30, and on alternate Fridays. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Seidel, can be contacted at (703) 308-5115.
